*The Home You've Always Wanted . . . at a Price You Can Afford*

It's easy and it's *smart* to own your own home today. More and more people are taking advantage of the security, comfort and savings in home ownership. Homes are better built, easier to live in than ever—and easier to buy.

Building methods are more efficient; fewer men can build a house in less time. Building materials are better, more plentiful, less expensive. And—we think this is important—some large manufacturers are now building homes, *better* homes at lower costs than ever before.

The Harnischfeger Corporation is one of these firms. For 18 years we've been guided by just one idea—making “better homes for more people at lower cost.” We haven't finished yet; we don't think we ever will finish. But we do think that this year's P & H Homes come closer to being the *perfect* home for families like yours than any yet built.

Look through this booklet, then see a P & H Home for yourself. We think you'll agree.

## *Room . . . Comfort . . . Beauty*

**EASY-LIVING ROOM DESIGNS**—Start in any room in any P & H Home—you'll find better, easier living built into every corner . . . Big rooms, bright rooms, rooms that make housekeeping more pleasant, entertaining more fun and living more relaxed.

Look at that step-saving kitchen, for example. It's compact and efficiently planned, yet there's room for everything—and plenty of dining space too.

**ROOM FOR EVERYTHING**—And these handy cabinets and counters put china and groceries out of the way, yet within arm's reach. No wasted steps here.

Bedrooms too have that extra design "something" that makes P & H Homes so livable. Plenty of room and closet space—and shoulder-high windows for added privacy and easy furniture arranging.

**HOUSEKEEPING'S A CINCH**—Even the walls and windows make living easier for the P & H home-maker. Crack-proof, cleanable Upson wall panels are room size—no joints to mar the clean unbroken surface. Decorating is that much easier. And the Rusco all-metal combination windows have self-storing storm sash and plastic screens. No painting or storing; leave them up all year; wash them completely from inside.

Everything's Easier *in a P and H Home*

*new trends in design*

**A WALL OF BEAUTY AND LIGHT**— Here's *everyone's* idea of gracious modern living—a wall of glass to bring outdoor beauty and sunlight in. This window-wall is insulating Thermopane glass, for lower heating bills, less fogging. *Window wall and pass-thru are optional in P & H Homes.*

**LIKE TO HAVE FRIENDS FOR DINNER?**— A P & H Home, with handy pass-thru kitchen counter, is for you. Just *pass* your settings and dishes over the counter, from kitchen to dining space. A wonderful step-saver for any hostess or home-maker. It's a handy breakfast and snack counter, too.

**TALK ABOUT STORAGE SPACE!** When it comes to places to put things, P & H Homes are the answer to a home-maker's dream. Big closets with overhead shelves in every bedroom, and *built-in drawer space*. These handy, spacious drawer sections actually give you an extra dresser.

*More Room...*

*Fewer Steps...*

**... P & H CAPITALINE HOMES**

**ARE FLOOR-PLANNED THAT WAY**

---

WANT two bedrooms or three? Basement or utility room? Big home or compact home?

No matter what your family needs, no matter what your home budget allows, there's a P & H Home designed for you. Many different floor plans, all reversible. Each gives you as much actual living space as it's possible to put in a home its size.

You'll have space to spare. And yet, with all this space, you'll save *miles* in housework steps because of the careful grouping of rooms in P & H floor plans.

Each size and floor plan is available with any of the exterior styles shown on the next pages.

ARCHITECT DESIGNED

*...in styling ...in color*

*the way you'd have done it*

John Normile, A.I.A., architect and editor, created these home designs to make your P & H Home distinctively *yours*.

You can choose from 8 styles of the P & H Capitaline Home.

There are attractive color schemes to select, too.

Have your P & H Home finished just the way you like it . . .

in siding, shingles, brick, stone or any combination.

Each style is available for all P & H Home sizes, with

any of the floor plans shown on the previous page.

## Something New in LIVING LUXURY

### The P & H Fireplace-Carport Home

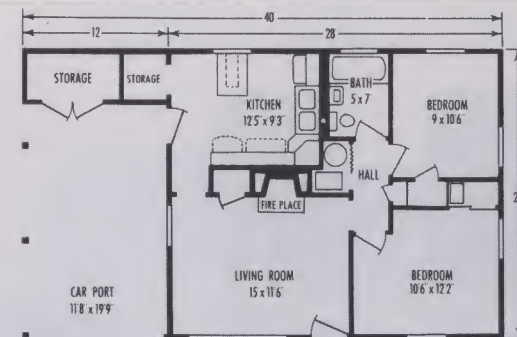

Nothing is as warming and friendly as a real wood-burning fireplace. So if your family's the popcorn-around-the-hearth kind, you'll love the P & H Home with its natural fireplace. And P & H now offers shelter for your car, too. As a matter of fact, the attached carport with storage unit can double in brass as a shaded

recreation veranda during hot summer days. Together or singly, these two new features add honest practicality, real design beauty to your new P & H Home. Plans shown are available in both Capitaline and Enterprise models.

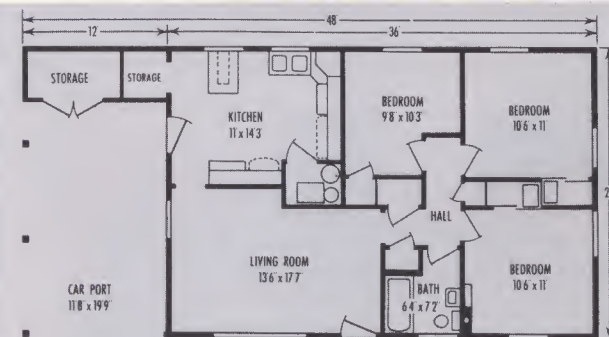

*The carport can be furnished with any P & H Home, if you desire.*

# EASY LIVING...

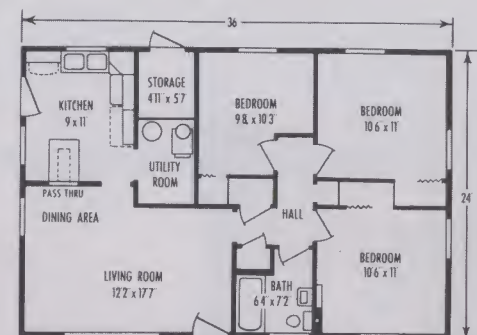

*at Budget Costs*

## The P & H Enterprise Home

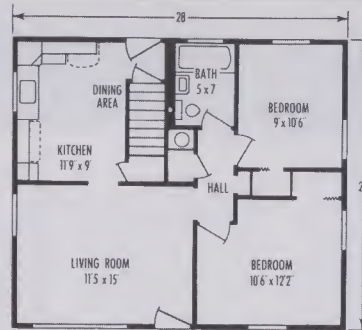

Here's the home that puts easy living within the strictest family budget. Enduring construction, fine materials, built-in comfort and architect design—trademarks of high-priced homes—are all there in the budget-priced Enterprise models. Available with 2 and 3 bedrooms, basement or utility room models. Floor plans, materials and careful craftsmanship are the same as the luxury P & H Capitaline Homes. You'll have plenty of closets, full insulation, Thermopane picture window living room, and Rusco metal windows. *Available with fireplace and carport plans.*

## SOLID CONSTRUCTION

You don't have to be an engineer or a carpenter to see that your P & H Home is built for years and years. The clean, careful, solid construction and the fine, seasoned lumber and building materials in P & H Homes tell the story . . . Low upkeep, less maintenance, longer-lasting value.

P & H Homes are *engineered* homes. Basic parts are precision-built in the P & H factory under controlled conditions so they fit perfectly and serve you longer. Doors and windows are carefully fitted and hung into walls; they don't leak or stick. Wall, ceiling and roof panels are built in rigid forms; they won't warp or crack.

Your P & H Home has a leakless, weather-tight roof. Tough plywood sheathing on sturdy roof trusses is covered by roofing

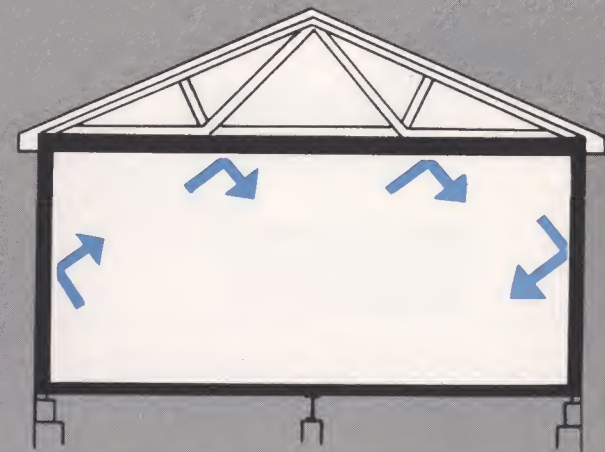

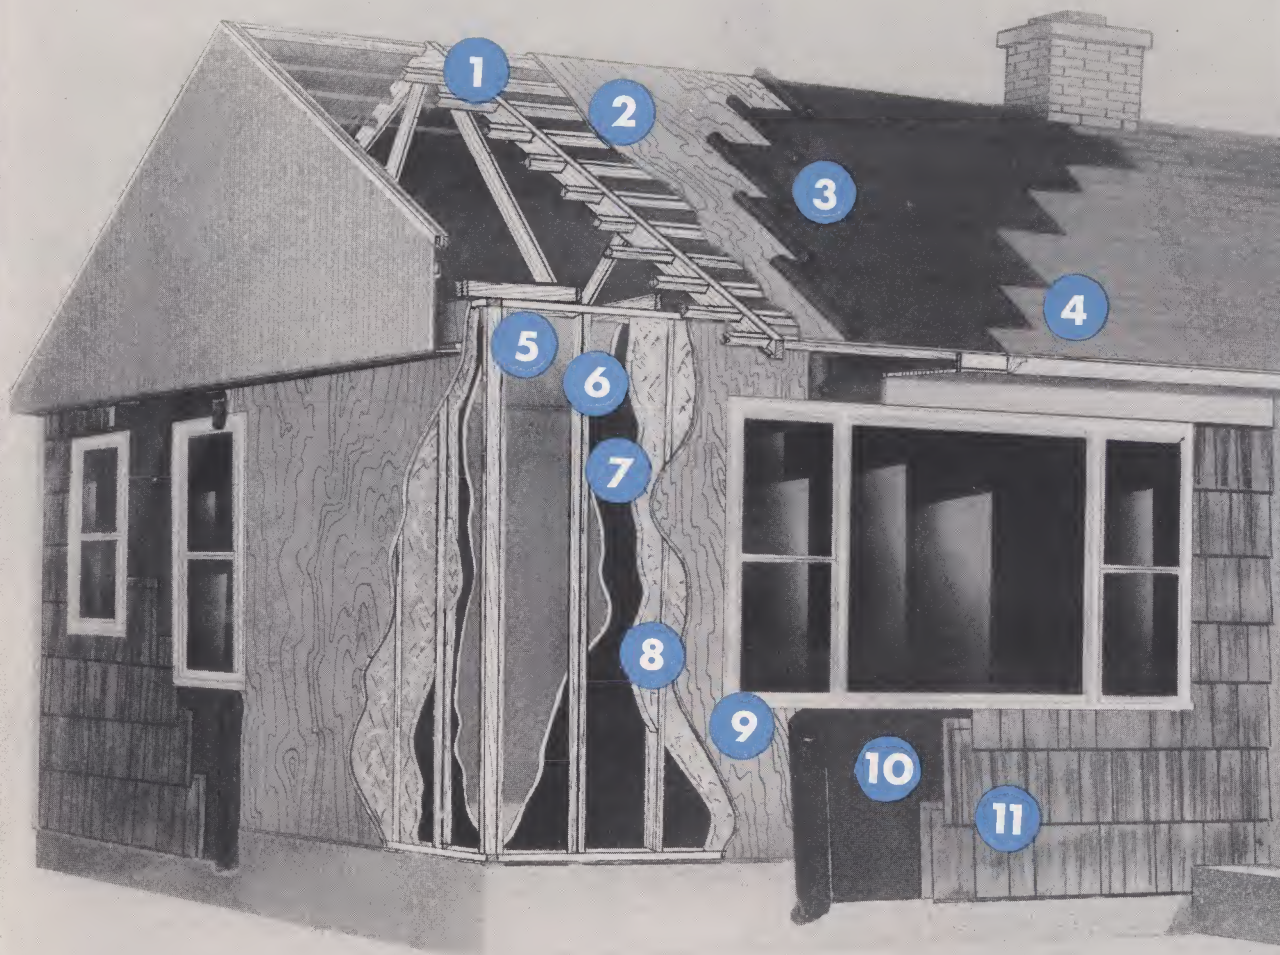

your builder applies. Ceilings are fire resistant, gypsum board panels.

P & H Home walls are twice as strong as standard plaster construction. Plywood outer panels and Upson board inside panels with a continuous moisture barrier keep your walls always dry, straight, solid. Framing members are nailed and glued with a waterproof resorcinal adhesive that's stronger than wood itself.

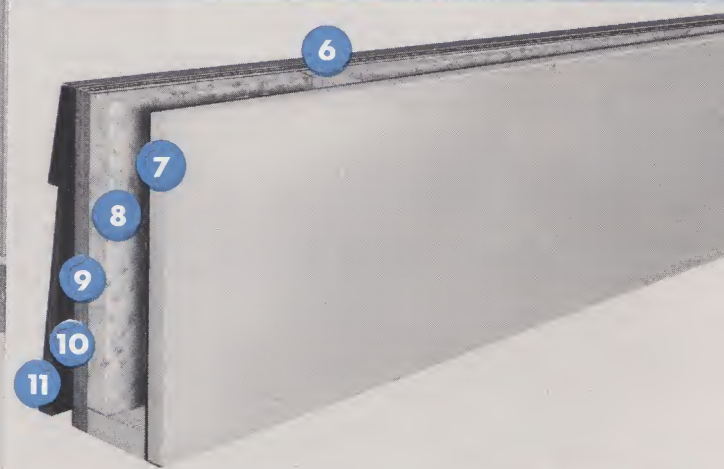

Your P & H Home is cool in summer, warm in winter—and heating bills are lower. There's a thick blanket of Fiberglas insulation behind every inch of ceiling and outside wall. P & H utility room homes are designed for perimeter warm air heating.

P & H Home construction meets the rigid requirements of private and government loan and building agencies.

A full blanket of Fiberglas insulation in P & H Homes cuts your heating bills, keeps your home cool in summer, warm in winter.

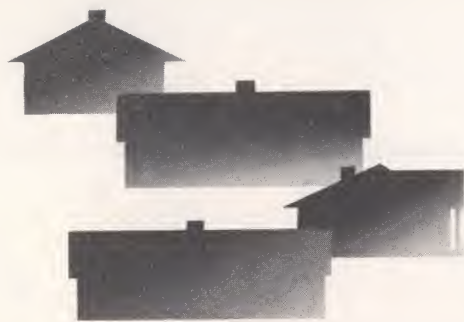

1. Truss Supports
2. Roof Sheathing
3. Roofing Paper
4. Asphalt Shingles

5. Gypsum Board Ceiling
6. Wall Framing Studs
7. Upson Board and Moisture Barrier

8. Fiberglas Insulation
9. Plywood Sheathing
10. Asphalt Barrier
11. Shakes or Siding

The walls in your P & H Home are *twice* as strong as plaster construction. They're warp-proof, crack-proof and always dry.

## Why Your P & H Home Gives You More for Your Money

**Y**ou get more quality, more *home* for your money when you buy a P & H Home. That's because a large company's engineering and purchasing resources, and big scale production can *give* you more. You get better materials, better design, better workmanship, in a P & H Home than in any other at the same price.

P & H Homes are prefabricated—and better for it, we might add. Here's why. We believe that P & H factory-controlled construction methods give you a stronger, more attractive, more livable home.

Also, your builder can erect your P & H Home faster than a conventional home, and with less waste of time and materials. His risk and his

investment are less, too. All this cuts his costs, and gives you a better home at a lower price.

The fine building materials, the seasoned kiln-dried lumber, the quality millwork, hardware and kitchen cabinets all cost you less in your P & H Home. That's because we buy them in much larger lots than most builders can. (Just a look through a P & H Home tells you that only the best materials are used.)

Wall panels, roof trusses, and other parts of your P & H Home are built under controlled conditions, in rigid forms. Not only does this give you a home that's always tight and durable, it eliminates the spoilage and waste that add to the cost of so many homes.

And how many folks can afford to have a top architect design their home . . . or a color specialist provide color schemes? That's just what you do have, though, when you buy a P & H Home. Without any extra cost, you select a design, floor plan and color scheme done by one of the country's leading home architects.

When you decide to buy a P & H Home, your builder can give you an accurate, *firm* final price. No "hidden" costs can crop up due to unexpected changes in the price of building materials, etc.

You can move in quicker, too. P & H Homes go up faster, and there are no delays because of shortages of materials.

**PRODUCTION LINE TO SITE**—P & H Homes have quality, durability and beauty built in all along the line. Careful factory craftsmanship gives you a better home at lower cost. And that craftsmanship is carried through to the last shingle by your local builder.

## DON'T WAIT

... Don't wait any longer to give your family the luxury and the security that a P & H Home offers. P & H Homes are erected and finished on the site by experienced local builders and contractors. If you'd like the name of a P & H builder near you, write:

**P & H Homes**

**HARNISCHFEGER CORPORATION**

100 Spring St., Port Washington, Wis.

## Better Homes for More People at Lower Cost

**Y**OUR P & H Home will bring you more comfortable living at lower cost. That's due to Harnischfeger Corporation's engineering and manufacturing experience — pioneering *better ways* for industry, mining and construction for nearly 70 years.

P & H stands for Alonzo Pawling and Henry Harnischfeger who founded the company as a small Milwaukee machine shop in 1884. The P & H trademark has identified the ever-widening

P & H Line of pioneering products. The P & H electric overhead traveling cranes and electric hoists have substituted modern *thru-the-air* materials handling for back-breaking lifting.

P & H welding equipment and supplies help do a better job at lower cost in factory, farm and shipyard. P & H truck and crawler cranes, power shovels and diesel engines help cut costs in construction and mining. And the P & H Soil Stabilizer has brought high

speed, low cost methods to highway, street and airport construction.

Harnischfeger Corporation turned its engineering resources to modern home building in 1935.

More than 18 years and \$3,000,000 in research have gone towards making the 1953 P & H Home *your* idea of a home — *more livable, more efficient, at lower cost*. Today's P & H Home is *the better way* in living.
